AUDIT DATE: **Feb 21, 2018**

Revision 1

CERTIFICATE VALID FROM:

Mar 27, 2018 To Mar 26, 2019

AUDIT SCOPE:

Review of a citrus packing facility of approximately 190,000 sq ft with 29,000 sq ft of controlled storage. The building houses the packing line, with receiving and packed product storage. The facility operates from late September to April or May with one shift (varying lengths depending on demand) and up to 90 workers. Packing was observed during the inspection. Product is received in bins from the organization's affiliated growing operations. After going through optional degreening storage, bins are dumped into a hopper where the product is cull-graded, pre-sized, pre-rinsed with a single-pass spray of PAA solution, conveyed through a wet brush bed wash (detergent, recirculated high-pressure chlorinated spray with labeled single-pass potable water rinse per label), visual inspection and mechanical sizing before packing into cardboard cartons (some in bags). Product is optionally waxed. Packed product is stored for future shipping. No organics. No allergens. The antimicrobial level in the high pressure wash has been identified as a CCP.

PRODUCTS:

PRODUCT(S) OBSERVED DURING AUDIT

Grapefruit, Oranges, Tangerines
